

ACTIV F

UNIVERSAL NEUTRAL CLEANER

- Leaves a shining, streak free finish
- Neutral - safe on sensitive surfaces
- Effective with hard or soft water

A neutral cleaner concentrate for use on water-washable, alkali-sensitive surfaces.

A viscous, orange liquid that contains a high active blend of emulsifiers with a long lasting, mild foam to leave a shining, streak-free finish.

USES

Suitable to clean glass, aluminium, upholstery, Perspex, rubber, plastic and vehicle paintwork and body work, Activ F is a safe, neutral cleaner that leaves a clean finish, free from streaks.

Ideal for use throughout the automotive industry and for janitorial use as an effective neutral cleaner for all floors, walls and surfaces.

DIRECTIONS

AUTOMOTIVE

ACTIV F should be diluted at a ratio of 1 part to 150 parts warm water. Apply the solution generously with a sponge or cloth, starting at the highest point to be cleaned. After cleaning rinse off thoroughly, or alternatively mop up the surplus liquid with a well wrung out sponge or leather.

Do not exceed the recommended strength and avoid cleaning whilst vehicles are exposed to hot sun.

JANITORIAL

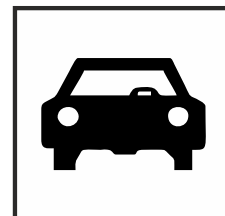

For general cleaning dilute 1 part of ACTIV F with between 80 to 160 parts of hot or cold water depending upon the degree of soiling. Mop floor or surface thoroughly with the solution of ACTIV F, wring out the mop and take up the surplus solution. Allow the floor to dry. Burnish the floor if required to enhance gloss.
